

Your trusted partner for Co-managed and Virtual CIO (vCIO) services

Skills, capability and solutions that provide you with cost effective IT services to deliver positive organisation outcomes.

Co-managed IT

We complement and extend your team by working with your existing vendors and technologies to give you the capability to do more.

- Flex the size of your team to take control of day to day and project workloads without increasing head count.
- Delegate workloads and automate day to day tasks, enabling your core team to focus on driving new organisation initiatives.
- Be agile, with specialist skills and experience when and where you need them.
- Build a more resilient team, enabling you to cover for leave situations easily and without impact to end users.

Virtual Chief Information Officer (vCIO)

When you don't have a dedicated CIO or IT team, we provide trusted advisers who genuinely care about your organisation and deliver IT that makes sense.

- We work as a part of your organisation, providing the transparency and insight required to run your organisation effectively.
- We ensure new IT solutions are the best fit for your organisation in terms of scale, security, availability and total cost of ownership.
- We ensure your technology solutions evolve with your organisation so you can plan (and budget) for the future.
- We ensure your organisation is prepared with effective continuity and disaster recovery plans and solutions.

Our Approach

By complementing or managing your IT operations, we enable you to take control of your current environment as well as providing a platform for future growth.

Our services, skills and expertise allow you to maximise the benefits of technology for your organisation.

Consult

With a commitment to understanding your organisation, requirements, processes and culture, we can ensure technology solutions will deliver to your needs.

Implement

As an extension of your team or dedicated project resource, we work with all parties to implement solutions that are in line with your strategy, flexible and future proof. This ensures you have the tools you need now and in the future.

Enable

With a focus on proactive support through strategic planning, monitoring and management, we provide continual improvements, mitigating risk and costs in your IT environment.

Services built for your organisation

...and relevant in a constantly changing technology landscape. Managed services provide a set deliverable for a set price, enabling cost effective and proven solutions that are designed to enable your organisation.

To complete your objectives

- Flex your team size to complete projects or manage changing workloads.
- Reactive support and unplanned outage response.
- Mitigate against user impact from staff leave or turnover.
- Review and strategically plan to reduce your IT operations costs.
- Design, implement and support new technologies and solutions.
- Automate or replace reoccurring tasks.
- Take advantage of cloud technologies securely.

Professional Services to meet any need

What you need, when you need it.

Sometimes it's just easier with an extra pair of hands or a fresh perspective.

Our team have the skills and experience to compliment and extend your capability to meet your short or long term requirements. We've got you covered from user facing support roles to implementation and ongoing support.
