The Cloud

SaaS: Software as a Service

Cloud Considerations

Understanding current drivers while identifying opportunities for innovation...

- Supported Technologies
- Managing Risk (DR & HR)
- Infrastructure Stability
- Future Scalability
- Organised Information
- Enhanced E-Discovery
- Increased Value
- Improved Productivity
- Sharing and Collaboration
- Increased Mobility
- Integrated Web Apps
- Security and Management

Cloud Journey

Cloud Relationships

- Reactive vs Proactive
- Strategic alignment
- Partnership approach
- Managed services
- Ongoing support, development and improvements

“The trust was already there and we are delighted with the results”

Dave Mangan, General Manager, NZ Golf

Cloud Platform

Cloud Productivity

- Fully installed Office applications... x5
- Office available on tablets and phones
- Online versions of Office – true collaboration
- Personal file storage 1TB+ per user
- Email, calendar, and contacts with 50GB inbox
- IM and video conferencing with Skype for Business
- SharePoint Online: document management, intranet, sharing, collaboration...

Cloud Services

- Op Ex vs Cap Ex.
- Per user per month
- Centralised management
- Customisable security policies
- Encrypted data and privacy rules
- Triplicated mirroring with 99.9% uptime guaranteed
- Far more secure and reliable than home grown

Cloud Collaboration

- Online intranet portal that can provide:
- Web based applications
- Simple user interfaces
- Structured, navigable and consistent
- Centralised document management
- Advanced external collaboration
